

TOWN MANAGER'S FY2019 BUDGET MESSAGE  
April 2, 2018

The FY2019 budget is presented for your consideration.

This budget presented is practical and balanced within the guidelines of the Council's budget resolution. While the formulation of the proposed budget is my responsibility, an effective draft comes only from the collaboration among the Town Council's Budget and Finance Committee, the Financial Committee, the Finance Director, and the Town's very dedicated Department Heads. Bridgewater is well served by this group of measured, thoughtful, and respectful public servants.

This year, as in the most recent years, our process has been challenged by several unavoidable increases in our employee benefit expenses.

This budget reflects only the simplest of fiscal policies due to the number of recurring constraints imposed on both revenues and expenses for FY2019. As a policy, our objective was to ensure the following:

- A balanced FY2019 budget
- Maintain current service levels
- Incrementally advancing my budget priorities
- Continuing the implementation of the Charter and Administrative Code
- Re-emphasizing our focus on economic development

#### A Balanced FY2019 Budget

Every city and town is required to formulate a balanced budget each year. How each municipality gets to that point depends upon the policies set forth by its governing body and management. As in the past, the Council has set forth resolutions which guides the development of the Town Manager's budget. Included in that direction is a conservative approach to revenue estimates. While this year's budget resolution allowed more flexibility in budgeting, our approach was consistent with the conservative approach we have used historically.

This year, your management team has focused on developing my budget in the context of future sustainability. For the first time, the five-year financial projection developed by our Finance Team has been wholly incorporated into our budget development process.

For the FY2019 budget, we have estimated most local revenue at 89% percent of the FY2017 actual receipts. We now can make a much more precise estimate of local receipts due to improvements in our financial systems which allow us to view multi-year trends. We are more adept at analyzing

national, state-wide, and local trends regarding many factors that play into the estimates we develop. We have used a 2.5% increase to personal and real property taxes and have incorporated the Governor's budgeted "Cherry Sheet" estimated revenues as provided by the Department of Revenue. We have increased the use of Ambulance receipts to \$1,539,163 because of more precise revenue projections showing approximately \$1,750,000 in annual revenue for FY2017. We have assumed a new growth figure of \$565,248 based upon the Assessor's early analysis of building permits and local trends. New growth is estimated by the Principal Assessor and is based upon the types and numbers of building permits and Planning Board approvals granted throughout the previous year. Again, these are relatively stable, quantifiable figures which are generated from our online permit program, financial accounting program, and professional staff analyses.

With these prudent revenue estimates, we have developed a realistic list of proposed expenditures, as a matter of simple policy, we have developed a budget which incrementally advances my budget priorities and maintains current service levels. The budget priorities for FY2019 are threefold:

- 1) Better fund our building maintenance budget, and increase our spending in this area;
- 2) Continue to build capacity in our Roadways Department, and;
- 3) Provide additional funding for our technology budget to better serve the public's changing methods of government interaction.

Due to resource constraints we have not been afforded the opportunity to make more significant advancements toward my fourth priority, Bridgewater's park systems. With the help of interim grant funding we will be able to defer this priority to next fiscal year. Deferring additional spending is a difficult decision to make, but, if done with sensitivity, it should position the Town for a better future.

#### Revenue Estimates

Pursuant to the Council's resolution, we have estimated local receipts based upon a comprehensive financial analysis to include historical trends, economic indicators, and identification of outlying anomalies.

Revenues are generally based on 85% to 90% of the prior year actual receipts adjusted for identifiable advancing trends or projections. Tax revenues are based upon the prior year's (FY2018) levy limit plus 2.5% as allowed by provisions of Prop 2 ½. Revenues flowing from the Commonwealth are estimated based upon the Governor's budget proposal. The Legislature generally does not finalize local aid figures until just prior to the beginning of the fiscal year. For FY2019, we have not used any overlay surplus to balance the budget, however we have reduced the amount required for the allowance for abatements and exemptions.

#### FY2019 Budget Work Programs by Department

For the most part, the FY2019 budget reflects a continuation of the long-term stabilization of Town finances and staff. It also generally seeks to systematically improve our technology to assure our ability

to provide better service at reduced cost in future years.

The following outlines the highlights and changes to work programs for each department:

1. Town Council: Other than salary alterations, the budget does not reflect a change in work programs for the Council. The budget was funded slightly below prior years.
2. Town Manager: The budget does not reflect a change in work programs. The Salary budget increased due to contractual obligations. The expense budget was funded to include many of the expenses that have been previously “covered” but not budgeted by the Town Manager’s office. Including these expenses provides more transparency.
3. Finance Committee: The budget does not reflect a change in the work program for the Finance Committee.
4. Reserve Fund: The budget does not increase the Reserve Fund and is therefore funded at the same level as prior year.
5. Finance Department: The budget reflects an advancement in the work programs, largely focused on implementing the pieces of the MUNIS system, continuing to advance the adoption of best practices, and resolving longstanding issues with tax title properties. The salary budget increased due to contractual obligations. The expense budget was funded to include historical requirements.
6. Law: No change in work program is anticipated. The department will continue to support the Manager’s office and other Town departments with legal needs. However, this department has been underfunded for many years, and, depending upon unanticipated litigation, often requires additional transfers prior to year-end.
7. Information Technology: This department will be absorbing the additional work associated with the implementation of the MUNIS financial system and includes funding of a part-time employee. All web site expenses and IT maintenance expenses have been included in the IT budget. The salary budget increased due to contractual obligations.
8. Town Clerk: The FY2019 budget anticipates three elections during the fiscal year. The Salary budget increased due to contractual obligations. The expense budget was funded to include the current requirements and the cost of the additional election.
9. Parking Clerk: There is no change to this department’s work program or budget. No change is expected relative to the paid-parking program.
10. Conservation: There is no change to the work program. The Salary budget increased due to contractual obligations.

11. Community and Economic Development: There is no change to the work program anticipated for this department. It will continue to focus on developing better processes and recruiting new businesses to Bridgewater. The department will expend considerable time in FY2019 preparing for a substantial re-write of the zoning ordinances. The Salary budget increased due to contractual obligations. The expense budget was funded to include historical requirements.

12. Zoning: There is no change in work program anticipated for this department. The Salary budget increased due to contractual obligations.

13. Town Buildings: This year we will staff building maintenance and grounds with one employee. We are adding this position which will be responsible for overseeing maintenance, organizing work plans, and managing contract work. The expense budget has been funded to include historical requirements and increased by \$150,000 to address building repairs that have not been made and/or have historically not been funded.

14. Gas and Oil: Due to relative low, stable prices, the line item has been level funded.

15. Police: The budget reflects contractual obligations and funding for the restructuring of the command structure as recently approved. The department will continue to invest in its partnerships with other departments to develop regional approaches to combat regional public safety problems such as gang-related crime, illegal drugs, and potentially violent situations.

16. Fire: The FY2019 budget anticipates no significant changes in the work program for the Fire Department. Of note, the operating budget includes contractual increases and some additional administrative hours, and the operating budget includes the related salaries for the additional firefighters who were hired through the SAFER grant in 2015.

17. Inspectional Services: The work program for Inspectional Services remains largely unchanged. With the new Building Inspector/Zoning Enforcement Officer, the department has become substantially more efficient. The statutory responsibilities keep staff extremely busy throughout the year. In addition, the department serves as the enforcement arm for many town zoning ordinances and bylaws. The Salary budget increased due to contractual obligations.

18. Animal Control: The work program remains largely unchanged. The Salary budget increased due to contractual obligations.

19. School Assessments: Education is the Town's single largest expense. By far, the largest assessment goes to the Bridgewater-Raynham Regional School District. Based on the adoption of some best management practices two years ago, we now provide much more predictability to our Regional School District by calculating our revenues early and establishing a revenue-sharing model

which shares revenue increases proportionally with the District. Although the District informally requested a 8.44% year-over-year increase to its operating budget, we continue to work with them to get to a 3.68 % increase in the District assessment for FY2019. This is one of the “fixed” costs that has traditionally placed significant pressure on the balance of the budget. This year, and moving forward, our financial projections, precise revenue calculations, and close relationship with the District allow us to share detailed budget information so the District and the Town will know exactly what the Town can afford for educational increases. Any required increase above the revenue-sharing allotment would necessitate a general override. In addition to the operational budget, the District long-term debt is assessed through this “department,” as are the Bristol Agricultural and Norfolk Agricultural Schools. The second largest assessment is the Bristol-Plymouth Technical School which is based upon the enrollment as of October 1 of 2017. Both Bristol and Norfolk are estimated assessment which will not be finalized until after the fiscal year has begun. Although the schools do constantly improve and change work programs from year to year, from the Town’s perspective, there is no major change anticipated to the FY2019 work program. The B-R Regional District continues to budget for increased contractual obligations, increases in special education, and significant increases in out-of-District placements. These have been the large drivers of the budget increases.

20. Roadways: The FY2019 budget reflects an increase of one position and additional money for line painting. Otherwise, we do not anticipate a drastic change in work program for the department. Credit goes to Superintendent Ron Ladue and his small staff for being able to accomplish what departments triple their size accomplish. In future years, we must prioritize the staffing needs of the department and the sizable capital needs but will do so in a sustainable and methodical way.

21. Snow and Ice: There is no major anticipated change in work program. This is the only “department” which is legally permitted to deficit spend. We estimate that FY2018’s deficit will be \$550,000. It is important to note that these deficits must be accounted for on the annual recapitulation. Fortunately, our conservative approach to budgeting allows us to cover these sizable deficits without seeking overrides.

22. Street Lighting. There is no meaningful change.

23. Health Department: No major changes to work program are anticipated in FY2019. The salary budget increased due to contractual obligations.

24. Elder Services: No major changes in general work program are anticipated. The Department continues to develop senior programs to suit the needs of the community as part of its mission. The salary budget increased due to a reduction in grant funding and contractual obligations.

25. Veterans Services: No major changes in general work program are anticipated. The salary budget has been increased in concert with the compensation plan.

26. Library: The Library continues to develop alternate staffing plans to help provide maximum assistance at the most effective cost. The FY2019 budget reflects the minimum spending to qualify for certification which assures state funding.

27. Recreation: There is no change in work program anticipated for FY2019. I had hoped to add a part-time position to help with our park system, but it was one of my goals that we could not afford in this budget.

28. Long & Short Term Debt Service: The FY2019 budget reflects a slight reduction due to the retirement of some debt obligations. Since this debt was “debt-excluded” by the voters when originally issued, the reduction in this line actually reduces the real estate obligation of property owners.

29. State and County Assessments: While these expenses are true assessments which the Council does not vote, they are presented in the general operating budget to show the expenses and what needs to be absorbed within the budget. Regardless, these expenses have not increased dramatically.

30. Retirement: The Town’s assessment increase for retirement increased by 8%.

31. Worker’s Compensation: The FY2019 budget is level funded from the prior fiscal year.

32. Medical, Life and Medicare: Not unexpectedly, insurance costs have increased over FY2018. Our health insurance is provided through a joint buying group, the Mayflower Municipal Health Group. We are seeing an increase of 4.71% in this large expense, or \$122,837. I carefully track the MMHG’s financial reports to ensure that the Town is not paying an artificially deflated amount for this important coverage.

33. Liability Insurance: Most of our insurances are offered through a municipal buying group, Massachusetts Inter-local Insurance Agency. MIIA offers generous credits for a wide variety of educational programs and incentives. FY 2019 is level funded from the prior year.

I look forward to defending my bare-bones budget proposal in front of the Town Council at a public hearing to be held at a regularly scheduled Town Council meeting.

Respectfully submitted,

---

Michael Dutton, Town Manager

### **Order O-FY19-001**

#### **FY2019 ANNUAL TOWN BUDGET**

**Ordered** that to provide for the payment of certain expenses of the Town for the fiscal year ending June 30, 2019;

The town will raise and appropriate and vote into tax, to be assessed per law and/or appropriate and transfer from the following available funds:

- Ambulance Receipts Reserved the amount of **\$1,539,163**
- Title V the amount of **\$121,351**
- Enterprise Funds the amount of **\$375,872**
- Conservation Receipts Reserved the amount of **\$71,750**
- Entergy Grant Funds the amount of **\$85,000**
- Fire Salary Budget FY18 **\$384,893**
- Energy Funds the amount of **\$67,567**

For the operation of the Town and further that such appropriation in the sum of **\$55,776,117** be for personal services, general expenses, principal and interest, for such purposes, each department and group being considered a separate appropriation as shown below:
